I N T R O D U C C I O N

El Anuario Meteorológico correspondiente al año de 1968 se presenta en tres tomos, así: Tomo I - Observatorio de Chinchiná, Tomo II Estaciones de Primer Orden y Tomo III - Estaciones de Segundo y Tercer Orden, y Puestos Pluviométricos.

NORMAS GENERALES

En todas las estaciones se efectúan tres observaciones diarias a las 07:00, 14:00 y 20:00 horas.

Las observaciones de nubosidad de Chinchiná se efectúan a las 07, 08 y luego bi-horariamente hasta las 20 horas, en las demás estaciones estas observaciones se ejecutan solamente a los tres términos reglamentarios.

Todos los datos observados y las gráficas de registro continuo de los aparatos de las distintas estaciones se remiten continuamente al Observatorio de Chinchiná, donde se realizan las operaciones estadísticas conducentes hasta llegar a la presente publicación.

PROMEDIOS

Los promedios diarios de la presión atmosférica (reducida a cero grados centígrados -0 °C- y gravedad normal) de la humedad relativa, de la tensión del vapor y de la nubosidad se calculan con base en la media aritmética de las tres observaciones realizadas:

$$\frac{07 + 14 + 20}{3}$$

El promedio de la temperatura se computa según la fórmula:

$$\frac{07 + 14 + 20 + 20}{4}$$

Las medias mensuales y anuales de los elementos referidos se obtienen de modo similar al promedio diario.

La cantidad de lluvia (altura en mm; superficie receptora aprox. 1 m de altura y de unos 300 cm²) es la suma de las cantidades caídas entre las 07 horas y las 07 del día siguiente, anotando el total para el primer día.

OBSERVATORIO DE CHINCHINA

Los datos de la Estación Central Observatorio de Chinchiná, se compilan en un tomo separado (Tomo I) porque, además de los cuadros comunes a las estaciones de I orden, se incluyen:

Cuadros mensuales de temperatura del suelo a los tres términos de observación, observaciones bi-horarias de nubosidad, evaluaciones horarias de Presión Atmosférica, de Temperatura, de Humedad Relativa, de Precipitación, de Brillo Solar, de Vientos y de Radiación Global, empleandose un actinógrafo Robitzsch.

ESTACIONES DE TERCER ORDEN

Para las Estaciones Heliopluiográficas que complementan la red meteorológica con registros automáticos de la precipitación y del brillo solar, se publican datos horarios y frecuencias de estos elementos, además de algunas características de la precipitación.

PUESTOS PLUVIOMETRICOS

Los datos de los puestos pluviométricos, instalados en su mayoría en fincas de caficultores, quienes atienden estas observaciones en colaboración directa con nuestro servicio por intermedio de los agrónomos del servicio de Extensión de la Federación, en los distintos departamentos, se presentan en forma de totales diarios y mensuales con la correspondiente suma anual. Cuando los datos de un mes están incompletos el total correspondiente se da en paréntesis. Solo se indican los totales de lluvia y de días lluviosos, cuando los datos de todo el año están completos.

DISTRIBUCION DE CUADROS ESTADISTICOS

Los datos completos de las observaciones se presentan según los siguientes cuadros estadísticos:

1 - DATOS DIARIOS

Son la compilación por meses de las observaciones principales realizadas en el observatorio de Chinchiná y en las estaciones de primero y segundo orden.

Se incluyen los valores observados en cada uno de los tres términos y se computa la media mensual correspondiente para cada elemento de acuerdo con los cálculos de promedio acostumbrados.

Los valores de cada término se refieren siempre a la hora oficial exacta y se cotejan previamente con los correspondientes en las gráficas de los instrumentos de registro continuo.

1 - 1 PRESION ATMOSFERICA

Se dan los valores sobre 600 mm de mercurio, que es el valor común en la zona cafetera. Se realizan para las estaciones de primer orden.

1 - 2 TEMPERATURAS

Fuera de los valores de la temperatura ambiental observados en los tres términos y de la media diaria correspondiente, se dan también los valores diarios absolutos, Máxima y Mínima en la caseta (unos 2 metros de altura) Mínima a 5 cm sobre el suelo.

1 - 3 TENSION DEL VAPOR Y HUMEDAD RELATIVA

Los valores anotados en estas columnas son observados en el término correspondiente, previamente cotejados con las gráficas del termógrafo y del higrógrafo, los cálculos de estos elementos se realizan según tablas psicrométricas, corregidas a 640 mm Hg.

1 - 4 NUBOSIDAD

Se indica, en décimas de cielo cubierto, la media diaria según el número de observaciones

1 - 5 BRILLO SOLAR

Se anota el total de la duración diaria del brillo solar en horas y décimas de hora (unos 2 a 10 m sobre el campo de observaciones). Se indica también el promedio mensual que se encuentra en los cuadros de Resumen mensual y anual (1 - 5).

1 - 6 PRECIPITACION

Se anotan las cantidades de lluvia correspondientes a cada térmi-

no; en la columna "Tot". Se indica la suma de lluvia computada para cada día (7 a. m. del día siguiente).

Al final de cada columna se computa la media mensual correspondiente. El total mensual se indica al margen en la parte inferior. Este valor también se encuentra en el cuadro resumen mensual y anual (1 - 5).

1 - 7 EVAPORACION

Se indica en mm el total de la evaporación en caseta (Balanza Wild de unos 250 cm²) entre las 7 horas de un día y las 7 horas del día siguiente, anotando el total para el primer día.

1 - 8 VIENTOS

Diariamente se anota a cada término la dirección del viento y su intensidad (unos 8 a 12 m de altura) según la escala Beaufort; con el fin de facilitar el manejo estadístico se codifican las direcciones del viento así: N = 16, E = 04, S = 08, W = 12, Calma 00.

2 - PRECIPITACIÓN PLUVIAL HORARIA

En cuadros mensuales se anota para cada día la cantidad de lluvia caída durante cada hora desde las 00 hasta 24. Al final de cada día se anota el total de la lluvia en las 24 horas, (el cual no debe confundirse con el total de lluvia, que se computa de 7 a 7 horas). Al margen en la parte inferior se indica la precipitación máxima en las 24 horas y el número de días lluviosos en el mes.

Estos cuadros solo se publican para la estación (Observatorio) de Chinichiná y los de las demás estaciones se encuentran en el archivo de esta Sección.

3 - HORAS DE BRILLO SOLAR

En cuadros mensuales se anotan los valores diarios del brillo solar registrado en cada hora durante la mañana (6 a 12 horas) y durante la tarde (12 a 18 horas). Se anotan también el total diario y el porcentaje correspondiente según el máximo posible (astronómico) para cada estación. Al final de cada columna se anota el total mensual y la media correspondiente a la duración y al porcentaje posible.

Estos cuadros, como los anteriores, solo se presentan en este Anuario para el Observatorio de Chinchiná los de las demás estaciones se encuentran en el archivo de la Sección.

4 - RESUMEN MENSUAL Y ANUAL

En este cuadro se resumen los promedios de los cuadros mensuales de datos diarios, en tal forma que del conjunto se pueden calcular los promedios anuales correspondientes.

Como complemento de la precipitación se indica el total anual de lluvia, la cantidad y la fecha de la máxima precipitación diaria correspondiente a cada mes y el número total de días lluviosos. Los totales de precipitación y de días lluviosos en este cuadro son de 7 a 7 horas y constituyen los totales mensuales que se tienen en cuenta para todos los cálculos de la lluvia.

Además se publican para las Estaciones de III orden Resúmenes Horarios de Brillo Solar y Precipitación. Para el Observatorio de Chinchiná, Estaciones de I y II orden se encuentran en el archivo de la Sección.

5 - FRECUENCIAS DE PRECIPITACION Y TEMPERATURAS

Según la precipitación observada, se indican para cada término las frecuencias mensuales de las sumas de lluvia mayores de 0.1, 10.0, 20.0, 50.0 mm; las mismas frecuencias se indican para los totales de lluvia diaria.

Para las temperaturas se anotan para cada mes las frecuencias de días con mínimas inferiores o superiores en 1.0 °C y con máximas inferiores o superiores a 2.0 °C del promedio mensual respectivo y de 0.5 °C para los promedios diarios.

Tanto para la precipitación como para la temperatura se incluyen también totales anuales de cada frecuencia.

Estos cuadros se presentan para el Observatorio de Chinchiná y para las estaciones de primero y segundo orden.

6 - FRECUENCIAS HORARIAS DE PRECIPITACION, MAS DE 0.1 mm

En estos cuadros se distribuyen para cada hora las frecuencias de lluvia observada (más de 0.1 mm) y se dan los totales correspondientes. La co-

columna final "Total" se refiere al total de días lluviosos en cada mes, de las 00 a las 24 horas de cada día. Se presentan para el Observatorio de Chinchiná y para las estaciones de I y II orden.

7 - FRECUENCIAS DE NUBOSIDAD, BRILLO SOLAR Y VIENTOS

Se indican las frecuencias mensuales de la nubosidad diaria inferior a 3.0 décimos (es decir día bien despejado) y superior a 8.0 décimos (días muy nublados). Como complemento de los datos anteriores se indican las frecuencias mensuales de días con brillo solar inferior a 0.9 décimos de hora (nublado) y superiores a 9.0 horas (despejado).

La frecuencia de los vientos se indica, anotando para cada término de observación las frecuencias mensuales de las direcciones N, NE, E, SE, S, SW, W, NW, C (calma), y en cada columna de frecuencias se da el total anual correspondiente. Estos cuadros se presentan para el Observatorio de Chinchiná y para las Estaciones de Primero Segundo Orden.

8 - FRECUENCIAS HORARIAS DEL BRILLO SOLAR

Se anotan las frecuencias de la duración del brillo solar pleno (horas completas) y de la ausencia de brillo solar entre las 6 y las 18 horas. Estos cuadros se presentan para el Observatorio de Chinchiná y para las Estaciones de I y II orden.

9 - RESUMEN DE ALGUNAS CARACTERISTICAS DE LA PRECIPITACION

Se acompaña un resumen de algunas características mensuales de lluvia, en el cual se indica: Total de la precipitación mensual; número de días lluviosos; número de precipitaciones diurnas (7 a 20 horas, se cuenta como nueva precipitación cuando el intervalo sin lluvia ha sido mayor de una hora); número de precipitaciones nocturnas (20 a 7 horas); Total mensual de precipitaciones; Máxima precipitación; Duración e intensidad media por minuto; Intensidad máxima por minuto; Precipitación de duración máxima (cantidad, intensidad media por minuto e intensidad máxima por minuto). Estos cuadros se presentan para el Observatorio de Chinchiná y para las estaciones de I - II y III orden.
